PROFESSIONAL SUMMARY

Junior Data Analyst with experience in data validation, quality assurance, reporting, and dashboard development. Strong proficiency in Excel, SQL, and Tableau, with hands-on exposure to Python for data cleaning and exploratory analysis. Skilled at following structured workflows, documenting processes, and ensuring accuracy in analytical outputs. Detail-oriented, organized, and motivated to grow within network reliability, operations analytics, and large-scale BI environments. Near-native English proficiency.

CORE SKILLS

Data Analysis & QA: Data validation, reconciliation, anomaly detection, data quality checks

Excel: Pivot tables, formulas, filters, aggregations, automation (VBA)

SQL: Data extraction, joins, filtering, aggregations

Python: Pandas, NumPy, Jupyter (reading/debugging scripts)

BI Tools: Tableau, Power BI (DAX, modeling)

Other Tools: SAP ERP, GitHub, documentation, workflow standardization

Soft Skills: Attention to detail, structured thinking, communication, bilingual (English C2)

Experience

Restaurant Manager

Tokyo Steakhouse – Lewes, DE | Jan 2026 – Present

- Managed daily operations, staff scheduling, and inventory accuracy.
- Applied structured workflows to maintain quality, reduce errors, and support decision-making.
- Analyzed sales and labor data to optimize operations.

Operations Associate

Sephora – Rehoboth Beach, DE | Mar 2026 – Present

- Performed inventory reconciliation, cycle counts, and discrepancy resolution.
- Followed standardized procedures to ensure data integrity in stock systems.

- Supported operational reporting and cross-team coordination.

Operations & Customer Service Specialist

Dunkin Donuts USA LLC – Rehoboth Beach, DE | 2023–2026

- Ensured accuracy in daily operational data, inventory tracking, and workflow execution.
- Followed structured procedures to maintain consistency and quality in high-volume environments.
- Applied analytical problem-solving to resolve issues and support operational decisions.

Lead Data Analyst – Customer Segmentation & NLP

Universidad Industrial de Santander – Remote | 2023 – 2024

- Cleaned, validated, and transformed large datasets using Python.
- Built segmentation and sentiment analysis models using NLP techniques.
- Developed dashboards (Power BI/Tableau) to visualize KPIs and behavioral insights.
- Documented processes and validation steps for reproducibility.

Administrative & Data Analyst Assistant

Universidad Industrial de Santander – Colombia | 2021 – 2022

- Automated ~80% of reporting using Excel VBA, reducing manual errors.
- Conducted data validation and quality checks for institutional datasets.
- Created tracking and performance reports for operational teams.

RELEVANT PROJECTS

Tourism Intelligence Analytics (NLP + Segmentation + Sentiment Analysis)

- Analyzed 17 years of hotel reviews using Python, NLP, and clustering.
- Conducted sentiment analysis and topic modeling to extract structured insights.
- Built dashboards to visualize customer segments and regional trends.
- Applied rigorous data validation and documentation throughout the pipeline.

Tableau Dashboards (Interactive)

Crime Victims in Colombia – Judicial Effectiveness

- Analyzed imputation, capture, and conviction rates; validated categorical and geographic data.

Colombian Ethyl Alcohol Exports – Trade & Tariff Analysis

- Visualized export units, trade balances, tariffs, and growth trends; ensured metric consistency.

Skills

B.Sc. Industrial Engineering Universidad Industrial de Santander (UIS), Colombia
